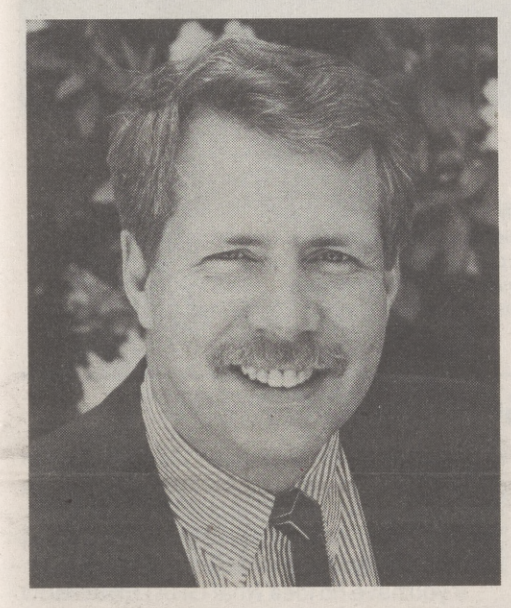
Warner Greene Named Director of New AIDS Institute

Noted molecular biologist Warner C. Greene, a physician from Duke University, has been named director of a new institute of virology and immunology devoted to the study of AIDS. The institute, which will be an integral part of the Gladstone Foundation at San Francisco General Hospital, will be one of the largest virology/immunology research institutes in the US dedicated to the study of human immunodeficiency (HIV) disease. Greene will begin his duties on September 1.



The announcement was made by Raymond Baxter, director of the SF Department of Public Health; Joseph B. Martin, dean of our School of Medicine; and Gladstone Foundation trustee Richard Brawerman.

The institute is located on two new floors of an existing building at SFGH.

The planning, design and construction of the new center, the second US AIDS research facility outside of the National Institutes of Health, was funded by the California Department of Health Services at a cost of approximately $12 million. The Gladstone Foundation and UCSF will provide funds for additional construction and equipment. Gladstone will be responsible for the staffing and day-to-day operations.

Mayor Art Agnos, who played an active role in recruiting Greene, expressed confidence that the appointment would strengthen the institute's mission. "Dr. Greene's international reputation and stature will immediately enhance the center as a focal point for pioneering AIDS research."

Greene's research has included extensive study of HIV, particularly how the growth of the virus is controlled.

Oberg Takes Home Bowl of Hygeia

School of Pharmacy graduate Kristin Oberg of Vacaville won the top honor of the School — the prestigious Bowl of Hygeia award — during commencement exercises on Saturday, June 15. Runners-up for the honor, which names the "ideal pharmacist," were Stephen Harris of Honolulu, Gary Laird of Santa Monica, Denise Takahashi of Los Angeles and Iris Tam of San Francisco.

Winning awards is not particularly new to Oberg. During the School's annual award ceremony on May 17, she was co-winner of the Associated Students Outstanding Service Award, and last year won the UCSF Chancellor's Award for Public Service and the Thomas N. Burbridge Award for her extensive volunteer work in the minority community.

Oberg was executive director of the Associated Students at UCSF this past year. She has lectured on matters of health education, drug abuse prevention, and minority student recruitment, and also helps translate for the hearing impaired. She plans to do her first-year residency in clinical pharmacy at Duke.

Terry Lee

"The Carnaval is 'saei,' which means very exciting," says Neuza.

Meet Neuza, Carnaval Queen!

"When I get into the streets and start dancing, I feel like I'm flying," explains Neuza Duarte-Brown, who was this year's Carnaval Queen during the last weekend of May.

Neuza has been dancing in Carnaval in the Mission ever since it began in 1968. "Carnaval is my soul. I love it." While she readily admits that Carnaval is her life, Neuza does have a job, and it is here at UCSF. She has been in the Physical Plant Department for the last six months as part of our custodial service, working primarily in the School of Medicine.

However, it's back in those crazy streets where Neuza loses herself. "The music really moves me," she says.

But, how did she become Carnaval Queen? Neuza explains, "They used to put in a nice, beautiful girl. But, for the last two years they've had auditions." This year's were held on Easter Sunday.

"Even though it was a holiday, I took my costume out of the trunk and went to try out." The costume Neuza refers to is one of several she has designed and hand-sewn herself. This one took her six months to complete. "It has a big full skirt with many silver sequins," she says. When she got to the audition she found 22 others vying for the title. She says, "There were all these beautiful girls there in bikinis. But, I had my little tape with my samba song, and I just stuck it in the machine and danced."

It didn't take long for the judges to decide that Neuza, even though not in minimal attire, exuded something special. She says, "I knew that when I first walked in the judges had their eyes on me." She adds, "I was contestant 13. And that just happens to be my *lucky* number."

In the Bay Area for the last 23 years, Neuza is a native of Rio de Janeiro. She explains how she came to the US: "I was working at a hospital information desk and I met an American woman. Americans seem to like me, and I like them. Anyway, we became friends and she asked me to babysit her little girl. I did that for eight years and then they came back to San Francisco. They wanted to fly me out to be with them. I said yes, and I lived with them for two years before I got married." (The little girl now is 32 and a physician at California Pacific Medical Center.)

Neuza is grateful to be able to celebrate Carnaval in the streets of San Francisco. "It feels like Rio. It is terrific."

Neuza adds a special thank you to the campus. "UCSF donated parking in the lots at 15th and Folsom and 17th and Harrison. Very important for all the people who wanted to shed their inhibitions to join in at Carnaval."

Patricia Lam Wins Sooy Cup

Patricia Pui-Yue Lam of Hong Kong won the Francis A. Sooy Chancellor's Cup during School of Dentistry commencement last Saturday afternoon. Runners-up for the award, the most prestigious the School bestows on a student, were Jeffrey D. Barton of Merced and Steven J. Graf of San Jose.

Lam, who now plans to become a general dentist in the San Mateo area, is a UC Regents Scholar. This year she was installed in the Omicron Kappa Upsilon dental honor society, and at the School's senior dinner on June 12 won the Academy of General Dentistry Award and the Alpha Omega Award for highest overall grade point average.

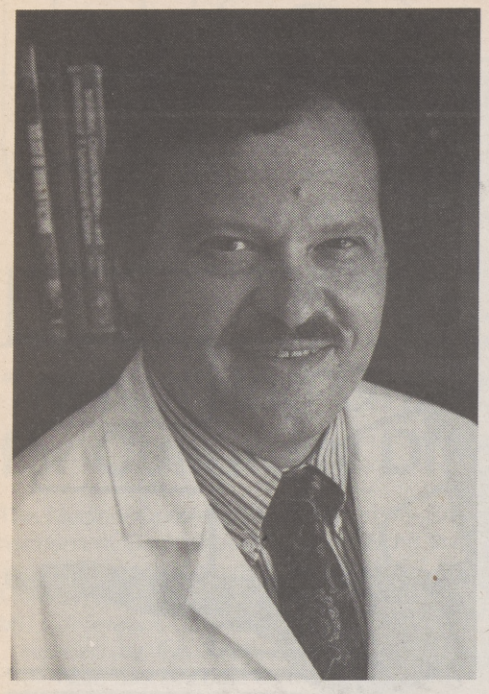
Sexism on Campus?

Many news items have surfaced recently in local papers regarding sexual harassment and latent chauvinism on campuses, particularly at Stanford. Several women doctors and medical students across the country say sexism, from the subtle to the downright ridiculous, still exists in the profession.

What is happening at UCSF? Do we have sexism here, especially in the academic realm? Are careers jeopardized?

See the next issue of *Newsbreak* to learn just how immune our medical complex is to these issues.

Arthur Weiss Is First Engleman Professor



Arthur Weiss, one of the nation's most respected immunologists, has been named the first Ephraim P. Engleman Distinguished Professor of Rheumatology at UCSF. Chief of rheumatology and immunology and associate professor, medicine, Weiss was selected for the new position in a nationwide search.

Chancellor Krevans announced the appointment on June 4 at a special dinner to recognize those who led the effort to create the $1.5 million endowment that funds the professorship. Endowment donations came from 194 individuals and foundations.

The professorship, focusing on arthritis, was established to honor the internationally recognized rheumatologist whose leadership on campus has greatly advanced the understanding of arthritis and improved care for its sufferers. Engleman, clinical professor of medicine and director of the Rosalind Russell Medical Research Center for Arthritis at UCSF, began studying arthritis and caring for its sufferers more than four decades ago.

The Engleman Distinguished Professor will hold a primary appointment in the Department of Medicine for the duration of tenure in the School of Medicine.

Weiss' research focuses on cell surface molecules and molecular events involved in T-lymphocyte activation. His work holds important potential for better arthritis treatments based on manipulation of the immune system and for advances in fields as diverse as organ transplants and cancer.

Nursing Student Award Winners

Marcia Ryder, Janice Wright and Kathleen Puntillo (left to right) were three of five students to receive honors at the School of Nursing's commencement exercises on June 7. Ryder received the Outstanding Bachelor of Science Award, Wright an Outstanding Master of Science Award and Puntillo a Distinguished Dissertation Award. Missing from the photo are Susan Shea (Outstanding Master of Science Award) and Linda Robrecht (Distinguished Dissertation Award).

Puttin' On the Hoods

Former Graduate Student Association (GSA) officers (left to right) Tracey Woodruff, bioengineering, Alicia Henderson, speech & hearing sciences, and Mitchel Sutter, bioengineering, proudly show off their PhD hoods, compliments of the Graduate Division Alumni Association for their leadership roles in the GSA. Woodruff was director, external affairs, 1988-90; Henderson, chair, basic & social sciences and director, finance,1988-89; and Sutter, president and campus office director, 1987-89.

UCSF at International AIDS Conference

UCSF researchers presented some 60 papers and abstracts at the Seventh International Conference on AIDS held in Florence just a few days ago.

At the conference, Paul Volberding, UCSF professor, medicine and director of the AIDS Program at SFGH, was named the first recipient of the L.I.F.E. International Prize. The $20,000 award recognized his landmark study of the effects of early treatment with AZT on people infected with HIV, which was published in the *New England Journal of Medicine* in April 1990.

UCSF research presented at the six-day conference included:

- John Watters in the Institute for Health Policy Studies and colleagues found that the controversial practice of providing intravenous drug users with clean hypodermic needles is an effective AIDS prevention measure.
- A significant percentage of heterosexual African-Americans and Hispanics may be putting themselves at risk for AIDS because they don't like or believe in condoms. The study was led by Susan Kegeles in the UCSF Center for AIDS Prevention Studies.
- HIV is capable of "expressing" itself in cells of the early embryo in a mouse model. Expression is the process of the virus making more copies of itself and causing changes in the cell that result in HIV infection, says mammalian developmental biologist Patricia Calarco.
- Immune system cells called CD8 lymphocytes can stop HIV replication by blocking production of RNA. The researchers, led by Carl Mackewicz in the Cancer Research Institute (CRI), say that their finding may lead to new ways to bolster the body's defense against the AIDS virus.
- Even small differences in the protein coats of HIV strains may determine whether an anti-HIV antibody prevents infection by the virus, has no effect, or actually stimulates the virus to grow. The team was led by the CRI' s Srisakul C. Kliks.
- Lawrence Kaplan and colleagues at SFGH reported that survival rates and clinical behavior of AIDS patients with non-Hodgkins lymphoma may be determined by the molecular characteristics of the tumors.
- A study of women infected with HIV has found that 44% also were infected with human papillomavirus (HPV). HPV infection eventually can lead to cancer of the cervix if it is not diagnosed and treated. The research was led by the School of Nursing's Ann Williams.

Do You Know "LOANSOME DOC?"

You're sitting in our new library at a PC and you are busy examining all the citations you just retrieved during your GRATEFUL MED search. You say to yourself, "Gee, it sure would be nice to have a copy of this article and have someone mail it to me." Well, now you can — thanks to a new feature called LOANSOME DOC.

LOANSOME DOC is available when you use version 5 of GRATEFUL MED on a PC. Minimum charge per article is $6.50 for items owned by the UCSF Library, and may be billed to your UCSF department account. There is no charge for documents not at UCSF but available from another UC library.

If you have no idea what GRATEFUL MED is, let alone LOANSOME DOC, why not stop by the library's reference desk and pick up the information fliers and registration forms. You also may call 476-8272 or 476-8383.

Diabetics Sought for Novel Drug Trial

UCSF doctors are looking for both non-insulin dependent and insulin dependent diabetics willing to participate in a trial of a promising though still experimental drug that could prevent two of the most common serious complications of the disease — deterioration of the retina, with eventual loss of vision, and kidney damage.

The drug, produced in pill form under the trade name Tolrestat®, is being distributed to more than 75 centers in the US and Canada and in a broad trial that will embrace several thousand diabetics.

Study leader is Martha Nolte, assistant clinical professor, medicine and co-director, UCSF's Diabetes Center. For further information call 476-1364.

Nursing Leader Returns

Lucile Petry Leone (left), one of the School of Nursing's most illustrious figures, was back on campus to be honored at a special tribute on May 31. Leone herself was chosen as the 1991 recipient of the Leone Distinguished Professorship in International Nursing. Speaking in her honor were Marla Salmon of Public Health Services and UC Berkeley's Robert Bellah. Walking out of Cole Hall with Leone is her long-time friend and colleague, Associate Dean Zina Mirsky.

First Time in UCSF History
Four Women Win Senate Teaching Awards

For the first time in the history of this campus, four women professors have been presented Distinction in Teaching Awards from the Academic Senate. They are V. Courtney Broaddus, assistant professor, medicine and director, Medical Intensive Care Unit, SFGH; Jeanne F. DeJoseph, assistant professor, family health care nursing and co-director, Nurse-midwifery Intercampus Program with UCSD; Donna M. Ferriero, assistant professor, pediatrics and neurology; and Jeanne M. LaBerge, assistant professor, radiology.

Honorable mentions also went to women — Mary M. Cooke, associate professor, clinical medicine and Caroline H. Damsky, professor, stomatology and anatomy and director, Graduate Program in Oral Biology.

Established by the Academic Senate in 1951, the awards were presented on June 5 by Leonard B. Kaban, professor and chair, oral and maxillofacial surgery, on behalf of the Committee on Academic Personnel. Faculty are nominated by students and colleagues from the four professional schools and the Graduate Division.

DeJoseph

Ferriero

LaBerge

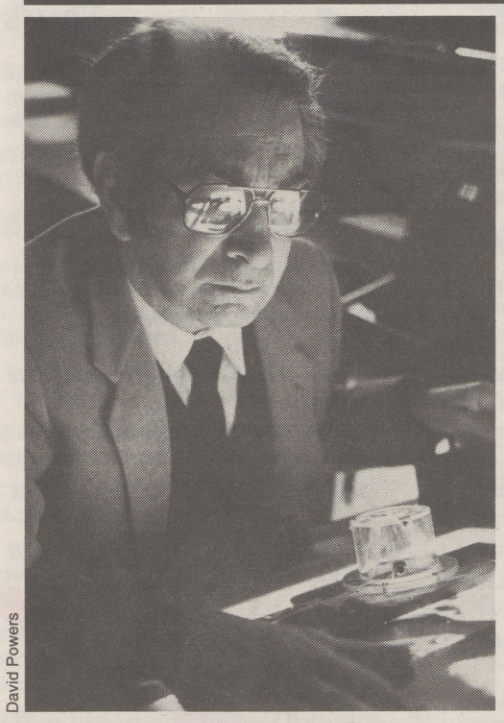
Honors & Awards

Julius R. Krevans: Received the 1991 Distinguished Citizen Award from the Harvard Club at its annual dinner on June 19. The award recognizes his major role in developing public policy in medical education and in advancing biomedical research. Krevans is chancellor; professor, medicine.

Steve Leighty: Received the Delta Dental Student Leadership Award in recognition of his outstanding leadership abilities. Leighty is a 1991 graduate, School of Dentistry.

Jay A. Nadel: Awarded the "Laures honoris causa in Medicina e Chirurgia" (honorary degree in medicine & surgery) from the University of Ferrara, Italy, at their 600th anniversary celebration in June. Nadel is professor, medicine, physiology & radiology.

Janet E. Norton: Named chair, Western Region, Association of American Medical Colleges. Norton is director, institutional relations.



David Powers

Dental School Honors Baumrind

Sheldon Baumrind, professor, growth & development, was honored by the School of Dentistry as the Fourth Faculty Research Lecturer on June 4. Also a professor, radiology and orthopaedic surgery, he discussed "Making Clinical Research a Science."

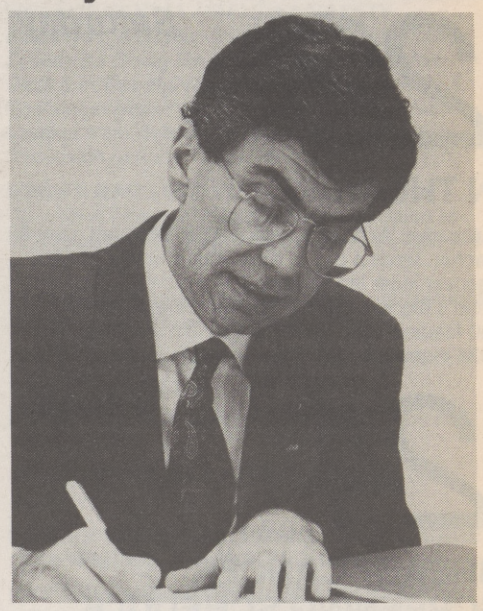
Woodside Vanpool Riders Needed

Vanpool riders are needed from Woodside or nearby areas. The van arrives at UCSF at 7:50 a.m. and departs at 4:40 p.m. each weekday with pick-up points at Oxford Street in Redwood City, Carolina and Woodside Road in Woodside, and Edgewood and I-280 in San Carlos. Interested? Call Transportation Services at 476-1511.

Toxic Substances Research List

The UC Systemwide Toxic Substance Research and Training Program is compiling a compendium to list the ongoing research projects and courses on all of the UC campuses that have to do with chemicals and toxic substances and their effect on the environment. It is hoped that UC researchers and policymakers will use the compendium to increase their knowledge of environmental, ecological and engineering research going on within the UC system. If you are involved with environmental research at UCSF and would like to be listed in the compedium, call Gregg Cirillo at 916-752-2097 for an environmental research survey.

Lucier Appointed University Librarian



Richard E. Lucier has been appointed University Librarian and Assistant Vice Chancellor, Academic Information Management, effective July 1.

Lucier has been at Johns Hopkins University since 1986, first serving as assistant director for Research & Development at the William H. Welch Medical Library. In 1989 he was appointed associate director for Research & Computing and director of the Laboratory for Applied Research in Academic Information until the present.

Winner of this year's Academic Librarian of the Year and Frank Bradway Rogers Information Advancement awards from the Medical Library Association, Lucier served as director of Academic Information Resources Management, Medical Center Information & Communications, University of Cincinnati, from 1982-85.

Lucier is responsible for the overall management of the resources, budget and programs of the UCSF Library, including the new Center for Knowledge Management. He replaces Richard Cooper, who has served as Acting University Librarian since the death of David Bishop in 1989. Cooper will step into a new position as director of Finance Planning and Administration for the Library and the new Knowledge Management Center.

Nobel Laureates Bishop, Varmus Elected to Institute of Medicine

J. Michael Bishop and Harold Varmus, winners of the 1989 Nobel Prize in Medicine, have been elected to the National Academy of Sciences Institute of Medicine.

The Institute of Medicine, established in 1970, conducts studies of policy issues related to health and medicine, publishes statements on these issues, and disseminates information to the public and major scientific and professional societies.

Bishop is professor, biochemistry & physics, and director of the George W. Hooper Foundation. Varmus is professor, molecular virology, microbiology & immunology.

In Memoriam

John Sapone: An emeritus professor of restorative dentistry, Sapone graduated from our School of Dentistry in 1953. He is best known professionally for the techniques he developed and perfected to treat nerves and blood supply during dental surgery. In 1981, Sapone was awarded the Medal of Honor by the Dental Alumni Association for his professional accomplishments. He maintained a private practice in San Francisco, was published widely in his field and taught graduate and postgraduate courses on campus. He was 73.

Michael T. Harris: A pharmacy assistant II since 1981, he worked in retail pharmacy before coming to UCSF. After four years in the in-patient pharmacy, he moved to Home Care, the section of the pharmacy which provides services to patients who are receiving care at home, such as AIDS, cancer and pediatric patients and those who need nutritional support (IVs). Harris took patient orders, organized supplies to be delivered and serviced the equipment being used by the patients in their homes. Harris was 37.

Hartzell H. Ray: A clinical professor emeritus of pediatrics, he was one of the first physicians on the Peninsula to specialize in pediatrics. He came to UCSF in 1928 after graduating from George Washington University Medical School. During his 47-year career, he founded the San Mateo Medical Clinic, was chief of contagious diseases at San Mateo Community Hospital and taught at Stanford. He was 95. Contributions may be made to Mills-Peninsula Hospital, the American Red Cross or St. Paul's Episcopal Church in Burlingame.

Joseph M. Crimes: A member of the campus community for 25 years, Crimes worked first in Laundry Services, then transferred to Environmental Services in 1971. He was an evening custodian in the ACC building. He was 74.

Publications

Robert Wachter: Author, *The Fragile Coalition: Scientists, Activists & AIDS* (St. Martin's Press, NY, 1991). Wachter is assistant professor, medicine, and served as program director for the Sixth International Conference on AIDS held in San Francisco last June. The book details the behind-the-scenes drama of organizing a scientific conference in the midst of political activism.

Anselm L. Strauss & Juliet Corbin: Co-authors, *Basics of Qualitative Method* (Sage Publications, London, 1990). Strauss is emeritus professor and Corbin is research associate, both social & behavioral sciences, School of Nursing.

Top Psychiatry Award Winners

Five residents in psychiatry and one fellow in child psychiatry walked away with top honors during the Department of Psychiatry's graduation exercises on June 14. Jeffrey Rowe, fellow in child psychiatry (second from left), won Special Recognition in Child Psychiatry; residents (left to right) John R. Sharp won the Alexander Simon Award; Jeanne Burns, the Edwin F. Alston Award; Paul Wilson, the Creative Psychiatric Resident Award; Sheldon B. Vile, the National Psychiatric Endowment Award; and Mark Swoiskin, the Henry F. Albronda Award.

Today/Tomorrow

22 Saturday

IN THE MUSE

A Creative Writing Workshop. Gail Newman, poet & teacher, leads a day of exercises & meditation to discover inner landscapes & to work through writer's block. $35-$50. Women's Resource Cntr., 100 Medical Cntr. Way. 10 a.m.-3 p.m. Call 285-7636 to pre-register.*

24 Monday

BREAST CANCER SCREENING SCHEDULE

Women can have low-cost mammograms—X-rays to screen for breast cancer—from a mobile van that travels to convenient locations in the Bay Area.

Women need the approval of their physician to have the mammogram, in addition to their physician's full name, address (including room number & zip code) & phone number to assure results are mailed promptly. The procedure takes approximately 20 minutes & costs only $50. To make an appointment call 476-2193 between 9 a.m. & 3 p.m.

The van will be at the following locations for the next three weeks:

- June 24-28: Levi Strauss Bldg. On Battery St. between Union & Greenwich.
- July 1-3: Westlake Shopping Cntr. Daly City, on Park Plaza Dr. near Safeway. (July 4 is a holiday.)
- July 5: UCSF-Mission Cntr. 1855 Folsom St., in parking lot behind building.
- July 12: UCSF-Parnassus Campus. On Parnassus Ave. at Medical Center Way.
- July 15-19: Marina Green. In parking lot near Goodwill shed & Ft. Mason.

A $50 mammogram also is available at the Mount Zion radiology department. Call 885-7710.

OTOLARYNGOLOGY GRAND ROUNDS: *Management of TMJ Problems.* Charles McNeill, TMJ Clin. & Rest. Dent. *Surgery for the TMJ.* Leonard B. Kaban, Oral Surg. S 214. 8-10 a.m.

VAMC NEURORADIOLOGY ROUNDS. 2A56, VAMC. 9:15-10 a.m.

FLOW CYTOMETRY COURSE JUNE 24-26

The Laboratory for Cell Analysis offers a three-day flow cytometry instrumentation course focusing on the operation of the instrument. 9:30 a.m.-noon. Call Bill Hyun or Delene Johnson at 476-2631 for information & to register.

VAMC NEUROPATHOLOGY CONFERENCE. Rm. 2A56, VAMC. 10:10-11 a.m.

OVEREATERS ANONYMOUS MEETING: The "H.O.W." Concept. A more structured approach to overeating. Speaker & discussion. N 417. Noon. Call Karen at 476-1077.*

FRIENDS OF LOIS AL-ANON MEETING. Closed meeting: for friends & families of alcoholics only. Rm. 300C, MCB. Noon.

FETAL & EMBRYO RESEARCH

Federal Policy on Fetal & Embryo Research: A Growing Wall of Separation. Former NIH ethicist John Fletcher, Ethics Program, U Virginia. Sponsored by the Prog. in Med. Ethics. HSW 300. Noon.

DERMATOPHARMACY/DERMATOTOXICOLOGY SEMINAR: *Noninvasive Sampling by Iontophoresis.* Girish Rao, Pharm. Surge Bldg. Conf. Rm. 115. 12:10-1 p.m.

LABORATORY MEDICINE GRAND ROUNDS: *Medical Applications of Electronic Mail.* Brian Colfer, Lab. Med. L 535. 4-4:50 p.m.

URORADIOLOGY CONFERENCE. M 464. 5:30-6:30 p.m.

THE NEXT DEADLINE

Tues., July 9, is the deadline for items to be listed in the next calendar, which covers **July 20-Aug. 16** (four weeks). They must be received in our office in writing by 11 a.m. on that Tuesday. Mail your copy to Michele Firpo at Box 0462, call 476-1541, send a fax to 665-8668 or bring it to S 20.

25 Tuesday

ORAL & MAXILLOFACIAL SURGERY GRAND ROUNDS. Residents Forum. C 701. 8 a.m.

TRANSFUSION RESEARCH FORUM: *A Novel Mechanism for Studying Viral Membrane Fusion Products.* George Kemble, Biochem. & Biophys. L 535. 8:30 a.m.

SFGH PEDIATRIC GRAND ROUNDS. Carr Aud., SFGH. 8:30-9:30 a.m.

NEW EMPLOYEE ORIENTATION: S 214. 8:30 a.m.-noon. Call Lenard Florendo at 476-1073 to schedule.

PEDIATRIC NEURORADIOLOGY CONFERENCE. HSE 317. 9 a.m.

OVEREATERS ANONYMOUS MEETING: Regular OA discussion meeting. N 717B. Noon.*

GERIATRIC GRAND ROUNDS: *Geriatric Emergencies.* Laurence Petty, Ger. Herbst Hall, MZ. Noon.

ANATOMY SEMINAR: *The ER-Golgi Intermediate Compartment.* Hans-Peter Hauri, Biozentrum, Basel, Switzerland. L 1361. Noon.

VAMC EEG READING SESSION. Bldg. 203, Rm. 2A49, VAMC. 3 p.m.

SFGH GI MEDICINE/SURGERY/RADIOLOGY IMAGING CONFERENCE. Rm. 1X58, SFGH. 4-5 p.m.

HEALTH PROS & WAR

Our Responsibilities Before, During & After the Shooting. Panel discussion & open forum. Refreshments served. Sponsored by the Committee for Peace Education at UCSF. HSW 300. 5-7 p.m. Call Dennis Davidson at 476-3515 for information.*

26 Wednesday

SFGH ORTHOPEDIC SURGERY STAFF CONFERENCE. Rm. 5K8, SFGH. 7:30-9 a.m.

MULTIDISCIPLINARY TUMOR BOARD: M 1296. 7:30 a.m. Call coordinator Barbara Jim-George, 476-1662.

CLINICAL HEMATOLOGY CONFERENCE. M 1296. 8 a.m.

OCCUPATIONAL & ENVIRONMENTAL MEDICINE GRAND ROUNDS: *VDT Worker Safety & Health.* Laura Stock, Labor Occ. Hlth. Prog. Bldg. 30, 5th fl., SFGH. 8-9 a.m.

NUCLEAR MEDICINE SEMINAR. LPPI Aud. 8:30 a.m.

BROWN BAG LECTURE SERIES: *Weight Loss Is Not a Cure for Obesity.* Joan Saxton, Med. & Neph.; Weight Mngt. Prog, Children's Hosp. HSW 300. Noon. Call 476-4394.*

PARNASSUS AL-ANON MEETING: For friends & families of alcoholics. C 517. Noon-1 p.m.*

ALCOHOLICS ANONYMOUS MEETING: Closed meeting: alcoholics only. Rm. 300C, MCB. 12:05 p.m.*

HEAD & NECK TUMOR CONFERENCE. A 723. 1 p.m.

PEDIATRIC UROLOGY CONFERENCE. M 464. 5:30-6:30 p.m.

PATHOLOGY GRAND ROUNDS: Year-End Holiday. HSW 508. 5:30-6:30 p.m.

REVERSING HEART DISEASE

Dr. Dean Ornish's Program for Reversing Heart Disease. Dean Ornish, Prev. Med. Res. Inst. Students $17, all others $34. Sponsored by UCSF Institute of Healing Arts & Sciences & the Learning Annex. Cole Hall. 6:30-9:30 p.m. Call 922-9900 to register.*

GREAT EXPECTATIONS PROGRAMS FOR PARENTS: *The Workplace: New Alternatives to Traditional Workplace Structures.* Linda Marks, Work Options consultant. $5. Co-sponsored by UCSF Health Net. LPPI Aud. 7-9 p.m. Call 476-6667.*

MULTIPLE HELPERS OUTREACH NETWORK SUPPORT GROUP: Meets every Wednesday to address issues of Post Traumatic Stress Disorder, multiple personality & dissociative disorders & the healing of long-term psychic scars. Ages 18 & over. N 517. 7-10 p.m. Help-line provided daily, 7 a.m.-10 p.m. at 759-7923.*

LIVING WITH HIV PUBLIC FORUM: *Women & Clinical Trials.* Sponsored by UCSF AIDS Hlth. Proj. Rm. 125, UCSF-Mission Cntr. 7-9 p.m. Call 476-6430 for information.*

27 Thursday

ORTHOPEDIC SURGERY STAFF CONFERENCE. Toland Hall. 7-8 a.m.

MEDICINE GRAND ROUNDS: *Advances in Internal Medicine: Acute Occupational Lung Syndromes.* Paul D. Blanc, Med. Cole Hall. 8-9 a.m.

SFGH NEUROLOGY/NEUROSURGERY CONFERENCE. Rm. 4H2, SFGH. 8-9 a.m.

PEDIATRIC GRAND ROUNDS: *Feeding Disorders in Infants.* Marjorie Palmer, Ped. S 664. 8:30-9:30 a.m.

SFGH TRAUMA CENTER CONFERENCE. Rm. 4H2, SFGH. 9-10 a.m.

PEDIATRIC TUMOR CONFERENCE. L 34. 11 a.m.-12:15 p.m.

MEDICINE/SURGERY ADULT CARDIAC CATHETERIZATION CONFERENCE. L 1361. 4-6 p.m.

CLINICAL ONCOLOGY CONFERENCE. M 1296. 4 p.m.

PRIMARY CARE GRAND ROUNDS: *Evaluation of Patients with Sexual Difficulties.* Thomas McAfee, Int. Med. A 455. 4:30 p.m.

RADIATION ONCOLOGY GRAND ROUNDS: *Development of High-Resolution Fiber-Optic Radiotherapy Portal Imaging Systems.* John Wong, Rad. Onc., Mallinckrodt Inst. Rad., Washington U. L 34. 5 p.m.

NEUROSURGERY GRAND ROUNDS. HSW 302. 5-6:30 p.m.

ALCOHOLICS ANONYMOUS MEETING: Closed meeting: alcoholics only. LPPI A222. 6 p.m.*

COMMUNITY HEALTH TALK: *High Blood Cholest-erol: What Should We Do About It?* Philip H. Frost, Med. & CVRI. Sponsored by Public Serv. Outreach Prog. Free parking. Chancellor's Rm., UCSF-Laurel Heights. 7-8:30 p.m. Call 476-8429.*

28 Friday

CRI HEMATOLOGY/ONCOLOGY JOURNAL CLUB. M 1296. 8 a.m.

MOUNT ZION MEDICINE GRAND ROUNDS. Herbst Hall, MZ. 8:30-9:30 a.m.

ALCOHOLICS ANONYMOUS MEETING: Closed meeting: alcoholics only. HSE 336. Noon-1 p.m.*

INSTITUTE OF HEALING ARTS & SCIENCES LECTURE: *Introduction to the Enneagram: A Spiritual & Psychological System.* Psychiatrist Mickey Indianer. N 721. Noon-1 p.m.

29 Saturday

SELF-DEFENSE CLASS FOR WOMEN: Street-wise personal safety, defense & escape methods. $25-$50. Marilyn Reed Lucia Child Care Cntr. 9 a.m.-4 p.m. Call 476-5222 to pre-register.*

WOMEN'S RESOURCE CENTER WORKSHOP: *Lovers & Allies: A Workshop for Lesbians in Interracial Relationships.* $20-$40. Sponsored by the Women's Resource Cntr. C 130. 10 a.m.-5 p.m. Call 476-5836 to pre-register.*

NUTRITION & PSYCHOLOGY

New Breakthroughs in Nutrition & Psychology: Influences of Blood Sugar Fluctuations. Daniel Herman & psychotherapist Helen Gallant. Sponsored by UCSF Institute of Healing Arts & Sciences. $25-$49. HSW 302. 1-5 p.m. Repeated Sun., June 30, in Mill Valley. To register call Herman at 661-4222 or Gallant at 566-0183.*

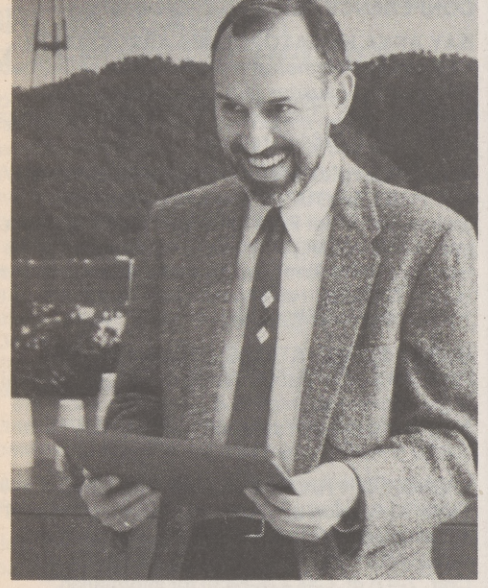
Benefits/Personnel

Fabulous Fred

"I think I'm fabulous, but this fabulous?" was Fred McEnroe's comment at a reception honoring his hard work with the Chancellor's Staff Advisory Committee (SAC). Fred, administrative assistant in the Office of Staff & Student Human Resources, has been taking care of a variety of tasks for SAC while not a member of the committee, including setting up meetings, taking minutes, handling the correspondence, arranging for the food (very important), and taking care of the finances.

At the reception on June 5, which actually was SAC's most recent meeting, Fred was presented with a plaque, a gift certificate to the Gift Solarium, flowers and a cake.

Fred now is a prospective full-fledged member of SAC (to be approved this fall).



Getting Ready for the AIDS Walk

UCSF walkers will help raise money for a variety of AIDS organizations as part of AIDS Walk San Francisco on Sunday, July 21. Last year, 85 campus walkers raised $12,000. This year, the campus hopes to raise even more. For the first time, UC-Berkeley is forming a team (sound like a challenge to you?). If you have not volunteered yet to be part of the UCSF team, just call Brenda Patterson at 476-8055.

When you volunteer, you'll get a great looking T-shirt, as modeled above by Sylviaette Gamble of University Advancement & Planning and Kean Tan of the UCSF AIDS Health Project (one of the agencies to benefit from the walk). And if you get $100 or more in pledges, you'll get a ticket to the City's thank you party on Sunday, August 11, at the Galleria. You'll get two tickets for $200 or more of pledges.

Wanted: UCRS Board Member

The advisory UC Retirement System Board has an opening for a non-Academic Senate member. Candidates are nominated by petition of at least 50 UCRP (UC Retirement Plan) non-Academic Senate members. Petitions are available from the Benefits Office at 476-4741. Nominations close Monday, July 15.

The UCRS Board has nine members. Two are ex-officio — the chair of the board, appointed by President Gardner, and the treasurer of the Regents (or designee). Three members are appointed by Gardner. Of the remaining four, two are selected by the Academic Senate and two are elected by active UCRP members who are not Academic Senate members.

Actual election to the Board will be in November.

How Are the Funds Performing?

For those invested in the 403(b) Plan and the After-tax plan, here are the latest unit values and monthly factors (as of May 31, 1991). If you have questions, please call 476-9256.

	Monthly Factors	Annual Rate
Savings	.0073	8.58%
Money Market	.0073	8.55%
ICC (formerly GIC)	.0057	6.70%

	Unit Value	1-Month Change	12-Month Change
Bond	$43.58	0.4%	13.5%
Equity	$76.64	4.0%	13.2%
Multi-Asset	$11.36	1.7%	N/A

Auxiliary *(from page 7)*

the announcement of this year's recipients of the Auxiliary's Special Projects, and Medical Staff president Ted Schrock's slide show of South Seas fish.

Officers Will Take a Second Term

All the 1990-91 officers are remaining for the 1991-92 term, and they are:

Ilse Steinbach, president
Lili Li Lim, president elect
Bobbie Kaiser, first vice president
Helen Ripple, second vice president
Pat Knight, third vice president
Betty Silverman, treasurer
Marylyn Pickler, secretary

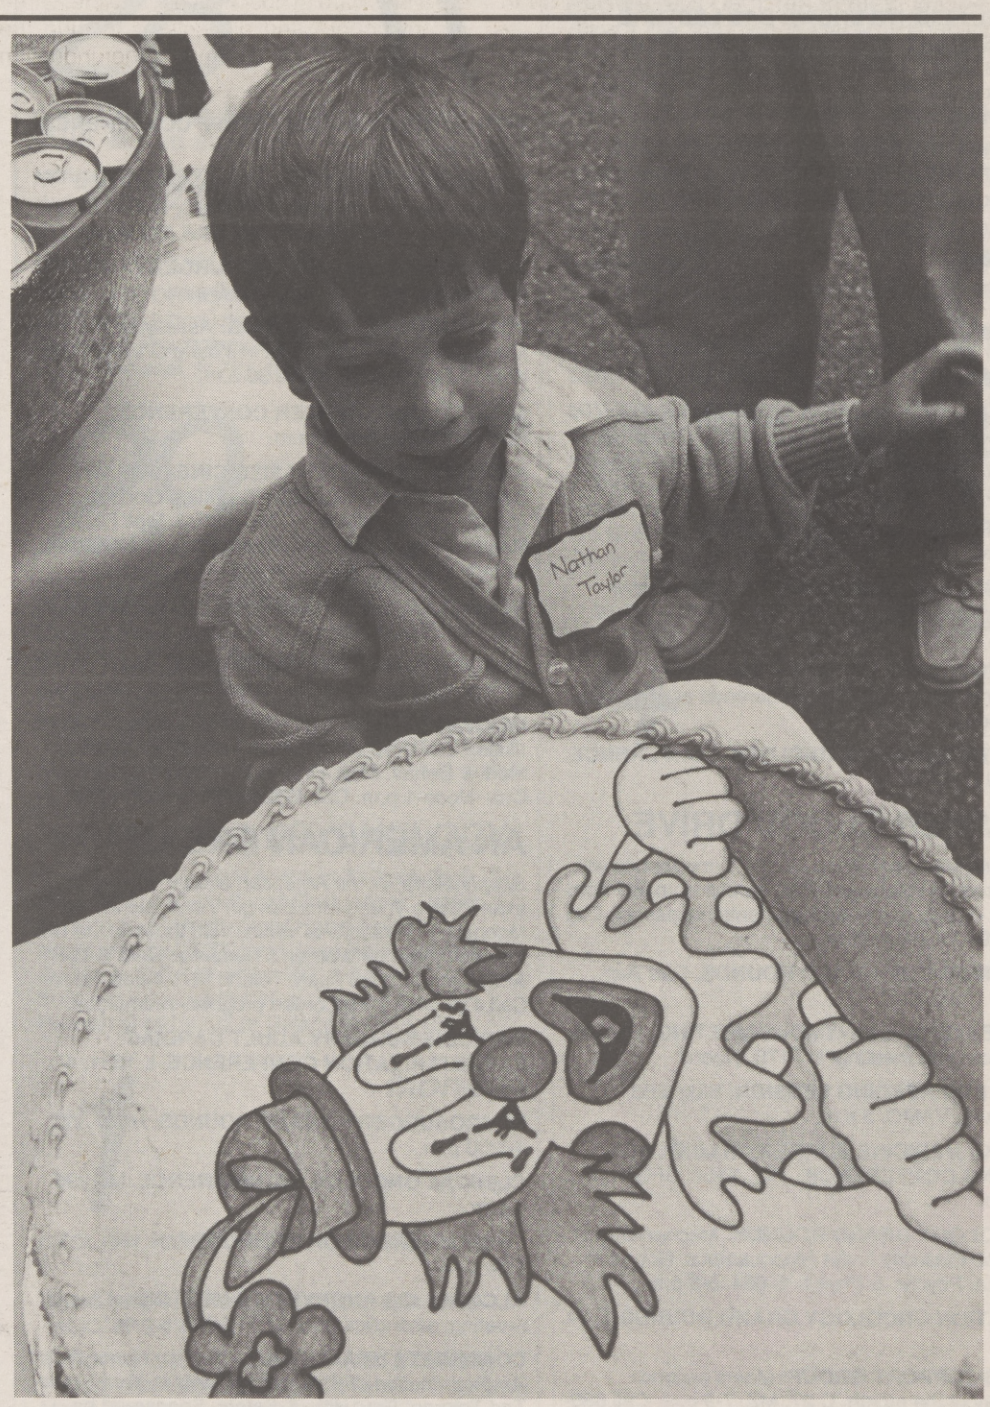
Special Projects Announced

The guests of honor at the meeting were representatives from departments that were the recipients of the Auxiliary's Special Projects this year. In addition to providing $7,400 to furnish four departments with artwork — Neurology, Peds Specialty Clinic, the Gamma Knife Suite and Pediatric Special Care (inpatient) — 10 other projects were funded:

- Pediatric Intensive Care Unit — Requested by Anita Weiss, $2,200 for 16 pagers for a one-year period. This is a trial program to furnish parents with pagers, so they feel they can leave the vicinity of the PICU without constantly fearing their child needs them in their absence.
- Physical/Occupational Therapy — Requested by E. Eastman, $7,000 to refurbish the outpatient treatment area with carpeting in 10 treatment areas, 10 low back support chairs and 10 bedside tables.
- 10 Long — Requested by the nursing staff, $867 for puzzles, games, cards and other patient diversions, plus cabinets, tables and chairs. For patients with arrhythmias which require monitoring, drug treatment and often several lengthy hospitalizations.
- Epilepsy Center Surgery — Requested by Mariann Ward, $872 for VCRs for three rooms where patients undergo continuous monitoring for seizures.
- Intensive Care Unit — Requested by Georgia Couderc, $1,487 for 24 personal radio/cassette players to help patients be less exposed to the sometimes noisy, disruptive ICU environment.
- Pediatric Practices I & II and Urgent Care, ACC — Requested by Elizabeth San Luis, $2,500 for toys, books, and a TV with a VCR for the waiting area.
- Behavioral and Developmental Pediatrics, ACC — Requested by Tom Boyce, $3,000 for various training aids for children and parents, video equipment and tapes for a resource library, and therapy toys.
- Nursing Education — Requested by Lyn Dow, $550 for ten "pocket talkers," which magnify voices, for hearing-impaired patients.
- MRI Center — Requested by Alex Margulis, $700 for a wall-mounted TV set for patients waiting for MRI procedures.
- 10 Long — $10,000 to refurbish the all-purpose room for patients, called the "solarium." The is the next room in the Auxiliary's ongoing program to renovate all the solaria and waiting rooms in Long and Moffitt Hospitals.

Ted Schrock's Fish Photography

Ilse Steinbach saw Ted Schrock's slide presentation at the Faculty Wives luncheon and asked him to do a repeat performance for the Auxiliary. He has many, many slides and considerable video footage of exotic fish and sharks of all varieties, all captured (the photos, not the fish) on diving trips he and his family have taken to various island sites in the Pacific. Ted takes the stills, his wife takes the videos, and together they have on film just about every strange and wonderful fish you can imagine: clownfish, frogfish, porcupine fish, stonefish, etc., etc., and plenty of sharks. He even has a mating sequence among a trio of sharks that he does a fine job of narrating. He says he has about 5,000 slides in his collection, not all of which he showed at the meeting, but certainly enough to keep many more groups entertained. Those who know him from the Medical Staff (of which he is president) or the Gold-Headed Cane Society (of which he is also president) might consider adding to his agenda at the next meeting.



In Vitro Babies Reunitus

Little Nathan Taylor (pictured above) is one of more than 150 children who have been brought into the world through UCSF's In Vitro Fertilization (IVF) Program. Nathan and his parents, Loretta and Bill Taylor of San Carlos, were among the guests at a June reunion of some 70 of these children, their families and IVF staff. The Center, which was established in 1984, is directed by Mary Martin.

Auxiliary Plans to Roast Chancellor Krevans

At the Med Center Auxiliary's annual meeting last week, the group announced plans for a fundraiser in the form of a roast of Chancellor Krevans on Thursday, October 3.

"He's never agreed to do this before," said event chair Pat Knight; and so far we know that Bill Kerr and Holly Smith are going to play some big part in it; and the Johnson & Johnson Company has come forth with a donation to help make it happen.

The hope, said Pat, is that so many people will turn out to see the Chancellor get roasted, or help roast him for that matter, that the organization will make $50,000 from the event. The money is slated for a new Pediatric Day Treatment Center in the ACC. Watch for further notice.

The other big news is that right on the heels of the Chancellor's Roast will be the Macy's Passport Show on Thursday, October 10 — a major local moneymaker that has chosen the UCSF Auxiliary and the UCSF Foundation as its beneficiaries this year. The proceeds are designated for AIDS-related projects and programs of the two organizations.

In addition to the preceding, there were three major highlights of the meeting: the presentation of the new officers for 1991-92,

(continued on page 6)

The Auxiliary's Pat Knight (center) with staff members representing departments that received "Special Projects" this year: (left to right) PT's E. Eastman, ICU's Georgia Couderc, 10 Long's Cindy Barton, Nursing Education's Lyn Dow, Epilepsy Center's Mariann Ward and Pediatric Practices' Pat Mattox. Also present but not pictured are Cynthia Charpentier of Behavioral and Developmental Pediatrics and William Wara from Radiation Oncology.

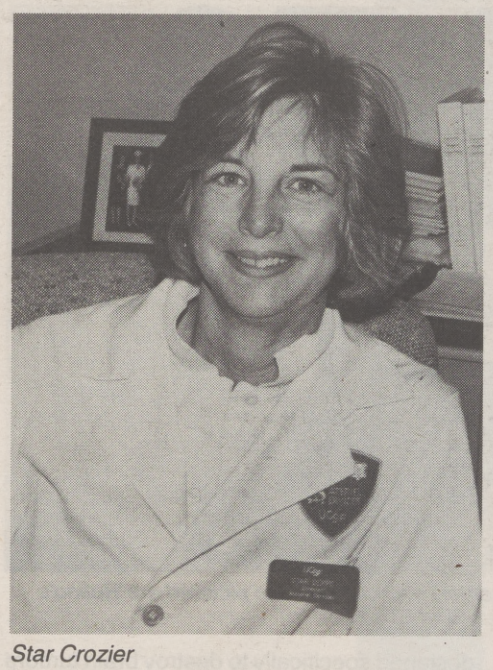
Brown Delivers Green and White Baby

Obstetrician Jeannette Brown called to report that she recently delivered the baby of two other UCSF doctors, Judy White and Sam Green — and the parents are tickled pink. "We got lucky — Jeannette was on duty that night," says Judy, an assistant professor of pharmacology and biochemistry. "But the main reason I say that is because she's a wonderful doctor." Their baby, Jonathan, won't go by the last name Green-White or White-Green — just Green. "Given a choice," says Judy, "it's better to be toward the beginning of the alphabet rather than always the last one in line." She says she and her husband, a biochemistry postdoc, are finding their baby to be a very colorful little person.



Star Crozier

Star Crozier Leaving for Lexington

Star Crozier is leaving her job as director of Materiel Services and taking off for the Kentucky hills. Friday, June 21, is her last day before she leaves to head the materiel services department at the University of Kentucky. It's hard to say good-bye, she says, but the lure of those rolling green hills was too much to resist (not to mention the fact she'll be a mere three hours away from her entire family in Indiana). From the Medical Center point of view, assistant director Dan Shydler says "a list of her accomplishments would be too overwhelming to review, but suffice it to say that Star established herself as a proven partner and definite asset to the Medical Center." Star arrived here nearly five years ago, and "through her leadership and managerial skills," says Dan, "the department has advanced significantly in operational, financial and service performance." The Medical Center marked her departure with a reception on Wednesday. For the interim following her departure, management fellow Sheila Antrum will serve as acting director and Earl McCowen as associate director.

National Nursing League Honors Helen Ripple

The section headed "Distinctions" in Helen Ripple's CV is going to use up all the bytes on the computer if she doesn't stop pulling in honors and awards from all over the world! Just this month at the National League for Nursing's 20th biennial convention in Nashville, she received the NLN's Jean MacVicar Outstanding Nurse Executive Award. The organization cited several examples of Helen's impact on the national nursing front, including her role in establishing clinical nurse specialists as part of the nursing team, now becoming a standard in hospitals nationwide. Other recent honors and distinctions include the Army's Legion of Merit medal, her induction into the American Academy of Nursing and her appointment to a second term on the governing board of the JCAHO. Helen is associate director of the Medical Center, director of nursing and associate dean of the School of Nursing.

American Cancer Society Honors Gail Perin

Pediatric oncology clinical nurse specialist Gail Perin recently traveled to Atlanta to receive the American Cancer Society's Lane W. Adams Award. She was one of 20 nurses nationwide to be honored with the award, which is presented to nurses "whose practice is characterized by excellence in providing compassionate, skilled care to persons with cancer and their families." You may remember Gail from an article in *Medsounds* a couple of years ago about her role in the production of a video on leukemia — all seen through the eyes of the Charles Schultz Peanuts characters. This gives you one example of her many contributions to cancer care.

Gail Perin

News Series on Epilepsy Patient Wins First Prize

KTVU-TV's series on an epilepsy patient's treatment at UCSF was named "Best Video News Series" in a healthcare journalism competition sponsored by the Hospital Council of Northern and Central California and the Society for Health Care PR and Marketing of Northern California. The series was about a patient named Betty Tolley from Red Bluff who had suffered from epilepsy more than 20 years at the time she was referred to the Epilepsy Center here at UCSF. She opted for a procedure which called for the removal of a walnut-sized portion of her brain where the epilepsy was centered. The Channel 2 reporter followed the process throughout, including the actual surgery. The end of the story is very happy: The surgery was absolutely successful — and so was Channel 2's coverage of it, obviously. The medical team included John Walker and Nicholas Barbaro; the News Office's Alice Trinkl and Andy Evangelista handled the story from UCSF's end.

Beartique Extends Hours

Due to wonderful consumerism running rampant in the Medical Center, the Beartique gift shop in the Moffitt lobby now is open on Tuesday and Thursday until 8 p.m. On all other weekdays the hours remain the same — 7 a.m. to 6:45 p.m. "Thank you for your patronage," is the word from Volunteer Services, which operates the bustling little business.

Incredible Patient Art on 11 Long

Art for Recovery director Cindy Perlis says to be sure to stop by 11 Long and see the display of artwork done by bone marrow transplant patients. "Some of the pieces are pretty incredible," she promises. Cindy, who conducts a broad scale art program for patients at UCSF and Mount Zion, says there are two other Art for Recovery exhibits planned for early fall — a big one at Congregation Sherith Israel in San Francisco and a smaller one in the Medical Sciences lobby at UCSF. Watch for notice.

Remember: "292" is Now "708"

All 292 prefixes on Page Net long range pagers have been changed to 708. The last four digits remain the same. Through July, if you try to use the 292 prefix, you'll get a recorded message reminding you of the new prefix. Direct inquiries to Marty Gustafson, 476-5050.

"Puttin' On Ritz" Raises $32K for Pedi Rehab

You may remember an item advertising the MZ Auxiliary's event at the Ritz Carlton to benefit the new Pediatric Rehab Unit at Mount Zion. The event raised $32,000 and the money is still coming in, according to MZ Auxiliary president Carol Weitz. At the MZ Auxiliary's annual meeting late in May, Weitz announced that the Auxiliary donated a total of $219,435 this year to MZ programs and services.

Bill Kerr's Office Sports New Trophy

May Day Run team captains Brigid Ide and Jimmy Choy recently attended an American Heart Association luncheon to accept the championship trophy, now housed among a collection that may someday take over Bill Kerr's office. If you remember, our UCSF teams won first and second place in this year's competition among Bay Area hospitals. If you like to participate in these fresh air-type benefits, take note: There's another one coming up July 21. See "AIDS Walk," opposite page.

Carol Campagnet

Carol Campagnet Retires

Add to the wave of distinguished retirees this spring another much-to-be-missed long-timer. After 33 years at Mount Zion, Carol Campagnet put in her final day on June 7. Beginning in 1957, Campagnet served as executive secretary to MZ CEOs for nearly 20 years, then transferred to the position of board coordinator for MZ Board of Directors. The Board gave her a proper send-off, including the ideal retirement gift: a computer system.

Diabetes Center Calls In Alumni

The Diabetes Center's Peggy Huang says the staff finally did something they've been wanting to do for a long time: They invited all their alumni back for a refresher course at Laurel Heights. To say "all" the alumni is an exaggeration because all the people who have received diabetes care instruction through the Center since it opened in 1979 would number in the thousands, says Peggy. So they invited everybody since 1985 — and got a capacity crowd from all over Northern California. The entire staff of the Center participated in offering an update on diabetes care, including physicians John Karam and Martha Nolte, diabetes educators Peggy Huang and Rae Jayne, the School of Nursing's Sally Rankin, nutritionist Claudia Davoli and counselor Wendy Ullman-Duarte.

Coming in July: Icons All Over the Med Center

Beginning July 1, 8,500 signs are going up throughout the Medical Center to help patients and visitors find their way around. The new signs will replace all current signs used for this purpose.

The installation, which is expected to take about two months, will begin in Moffitt and Long Hospitals, and then proceed to the ACC and the MU and ACC garages, according to Kirby Maples of Med Center Project Management.

To answer the problem of the variety of languages spoken, the sign program employs icons, or symbols. In addition to generic icons, such as those indicating elevators or restrooms, 25 special icons have been developed to represent departments, such as nuclear medicine, pharmacy, MRI, etc.

A central building directory containing the key to these symbols — with translations in Chinese and Spanish — will be installed in Moffitt lobby, says Kirby. Subsequently, handouts with the same information will be stocked in convenient places throughout the buildings.

The sign program, which has been in the making about three years, is part of a campuswide effort that already has resulted in the kiosks and building signs that recently were installed. The overall design, color scheme, etc., for the sign program were decided upon collaboratively by the Campus Graphics Committee and the senior officials of both the Medical Center and campus. If you have questions about the program, call Kirby at 476-6144.

A Star is Born

This photo constituted Justin Carlisle's first brush with stardom. A patient in the intensive care nursery at the time this was taken, Justin is among a number of ICN babies whose little "mugs" will liven up the pages of a newly revised ICN parent book the staff is putting together, headed by nurse Laurie Friedman. Justin is the son of Kyleen Carlisle and Justino Cardenas of Monterey.

Our Man From Manila is Cured

"X-Ray Beams Save Man From Manila" was the headline on an article that appeared in a May '88 edition of *Medsounds*.

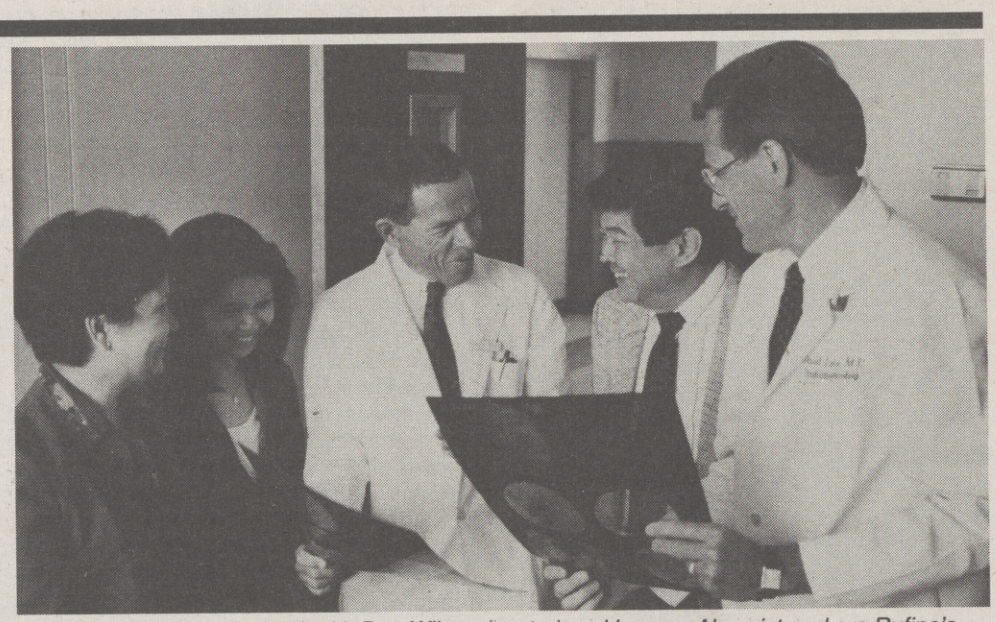
The story was about Ernesto Rufino, a 47-year-old businessman from the Philippines who underwent a new treatment at UCSF for removing a tangled cluster of blood vessels buried in his brain.

Rufino was the first patient at UCSF to undergo radiosurgery to remove these cerebral clusters — called arteriovenous malformations or "AVMs." The technique employs radiation to shrivel the vessels, as opposed to cutting them away with traditional surgery.

Good news: Recently Rufino was back for a checkup and the final word is, he's cured.

Since Rufino's case, about a hundred patients have been treated in the same manner, according to radiation oncologist David Larson, who developed the technique here at UCSF. The results have been about 90% successful.

The Rufinos, who have seven children including a daughter in San Francisco, say they are pleased to have been a party to history in the making at UCSF — especially since the outcome was so excellent. The family started the first HMO (health maintenance organization) in the Philippines, and said the path to UCSF was short and simple — "The whole world knows about Dr. Wilson" [neurosurgeon Charles Wilson]. They said another family member, a nephew, had a kidney transplant at UCSF.



Ernesto Rufino (center right) with Drs. Wilson (center) and Larson. Also pictured are Rufino's wife, Josefina (left), and daughter, Lyra Maceda.

A Better Way: The Gamma Knife

A new piece of equipment, due to be operational by late summer, will greatly upgrade the radiosurgery program at UCSF, says Larson. Called a "gamma knife," the equipment is designed specifically to destroy brain tumors and lends itself perfectly to the AVM procedure. The outcome of the procedure will be the same, says Larson, but the gamma knife provides a faster, simpler, more efficient means toward the end. Look for further coverage in conjunction with the August opening of the new gamma knife suite in Radiation Oncology.

UCSF Will Take Part in "Sharps" Disposal Program

Beginning in July, several agencies — including the UCSF Medical Center and SFGH — will participate in a citywide program to promote the safe disposal of needles and syringes, according to diabetes clinical nurse specialist Mary Sullivan.

In a six-month pilot program called "Don't Needle your Garbage Collector (or Your Environment)," people with diabetes and others who use syringes at home will be encouraged to pick up puncture-resistant "sharps" containers at no charge at Walgreen's, and then return the filled container to one of several drop-off points. Patients at UCSF and SFGH can pick up and return containers at the respective hospitals. (The UCSF site is the outpatient pharmacy in the ACC.) Two of the participating waste haulers have agreed to pick up the filled containers for disposal.

San Francisco garbage collectors have long been concerned about the possibility of getting stuck by used needles tossed into the trash, says Mary. But the situation came to a head when a bunch of syringes washed up on Ocean Beach a couple of years ago, ostensibly by way of the sewer system. All of a sudden it became a public problem. "There were even reports of used syringes being stuffed in mailboxes," she says.

Thus, a group consisting of representatives from the American Diabetes Association, the SF Chapter of the American Association of Diabetes Educators, Walgreen's, the City and County of SF, and all the major waste disposal agencies got together and worked out this plan. Mary represents both UCSF and the diabetes associations in the group.

Mary estimates there are about 15,000 people with diabetes in the San Francisco area, representing far and away the largest number of people who use syringes at home (at least legally). While pleas from garbage collectors did not solve the problem of syringe disposal in the past, the group is hoping the new program will provide some solutions.

"For the pilot program everything is being donated, including the sharps containers and all the human resources," says Mary. "We're not sure what will happen after that. For the time being, we just want to see if the program will work."

If you have questions about the program, call Mary at 476-2155 or long-range beeper 708-0764.
